MOAB

MOAB is a scheduling engine for HPC centers.

Warning

As adoption of MOAB has significantly reduced over the last years and there are no active users of Waldur with MOAB requirements, we have deprecated and removed MOAB provider.

Migration from MOAB to SLURM

If you are still running MOAB and would like to move to a supported scheduler - SLURM, please find the suggested articles below. They are provided by external parties with no affiliation to Waldur team.
